

InforFlex Upgrade

Offers customers a fast, low-cost, low-risk, path to an up-to-date ERP solution

Through a package of software and services, Infor's Flex Upgrade program gives BPCS and PRMS customers compelling, low-risk options to upgrade to the latest version of Infor ERP_{LX} – FP3.

Flex Upgrade offers significant benefits, such as a rapid implementation methodology and incentive pricing on additional users, additional modules and complementary Infor solutions.

Flex Upgrade makes it easier to take advantage of Infor's innovative service-oriented architecture (SOA) capabilities through the Infor Open SOA framework, such as **Infor MyDay** and other new component applications to be released throughout 2009 and beyond.

In many cases, customers are entitled to the Flex Upgrade programme at no additional software charge, as part of their existing maintenance agreements.

However, Infor Flex is available to all BPCS and PRMS users. CSI would be pleased to explain how the Flex programme can be applied to your unique situation.

If you would like to discuss Infor's Flex Upgrade programme in more detail and relate it to your own business requirements, please contact David Maskrey on **01623 726300**.

Infor Flex Upgrade Summary

A rapid, low-cost way for customers to take advantage of product innovations, by making it easier to adopt the current release of ERP_{LX} and a wealth of other SOA-enabled product offerings.

Flex Upgrade enables customers to leapfrog to new levels of business agility and functionality at a lower cost, with much less demand on business time and substantially less risk than the rip-and-replace approaches of competing vendors.

Modular services to develop a fast and reliable Hosting solution for your business

Benefits

Fast path to the newest application version
