

CSI Mobile Business Solutions

Providing reliable and accurate data access anytime, anyplace, anywhere

CSI mobile business systems (CMBS)

CMBS is a division within CSI dedicated to the delivery of business solutions where the automated, mobile capture of data and its integration with core business systems is a key requirement.

proven value

CSI has a wealth of experience in this arena, backed by an impressive track record and a proven methodology to deliver projects on time and within budget.

return on investment

The key deliverables for any data capture project are the timeliness and accuracy of data. The business benefits gained from these features depend on business context. For example, accuracy of stock data enables a reduction of inventory and eliminates stock-outs on the production line that invariably introduce savings. Similarly, the accuracy of delivery information produces the benefits of reduced returns, improved cash flow and increased customer satisfaction. The aim of CSI is to help businesses achieve the maximum ROI through the use of integrated mobile technologies.

a reputation for delivery

CSI has an enviable reputation for delivering a wide range of mobile solutions in a variety of business settings. With unrivalled success in the delivery of real time data capture via RF, RFID, Voice & GPRS from inside the enterprise or outside, from the shop floor to the warehouse or from the cab or the salesman, our experienced consultants can assure the adoption
