

# Rapid Deployment

## Take advantage of Rapid Deployment from CSI and alleviate the pains of implementing new software.

With Rapid Deployment, your organisation can benefit from peace of mind that your new software will be deployed on time and to budget through working within an agreed pre-set project plan and implementing a pre-configured solution.

### Some of the business benefits associated with Rapid Deployment include:

- **Reduced Costs**  
Typically 30% less than developing a bespoke solution
- **Reduced Lead Time**  
Saving approx 50% in deployment period through project accelerators and a proven project plan
- **Reduced Risks**  
Through testing and pilot environments together with defined deliverables and agreed expectations

### CSI working for your business

With over twenty years experience as one of the UK's leading business system i

ntegrators, CSI focuses on determining your exact business issues ensuring that our consultative approach helps us understand your requirements and reach your goals.

### Our approach

- Understanding your organisation, your applications and your technology
- Establish a clear outline of the processes you wish to enhance
- The criteria by which you will measure this improvement
- Where your business information resides
- How to use your existing technology
- Project timeframes

### Our Commitment

At CSI, we are committed to working with clients to provide business solutions to meet business needs – supporting immediate demands whilst providing flexible solutions that can meet future challenges.
