

# CYBER SECURITY PENETRATION TESTING

## TESTING, AUDITING AND CYBER CONSULTANCY SERVICES

Information security has become an increasing priority for organisations, with the need to secure sensitive data as paramount. As a result, CSI is partnering with information security experts Intertek NTA to offer a variety of consultancy, auditing and penetration testing services to help keep possible risks and vulnerabilities at bay.

Together, we provide specialist help working towards ISO 27001 certification, PCI compliance, improving security governance or risk assessment processes, security awareness training, incident readiness, cloud, BYOD, SIEM etc.

At CSI, we offer a partnership that gives you a perpetual edge over cyber security threats. Our advisory, professional and managed security services are brought together by a methodology that puts the reduction of risk at the heart of everything we do and ensures successful delivery of the security outcomes that underpin your business.

### Joint Partnership Services

#### Consult

Whatever information security related assistance you require, we will provide you with independent, unbiased advice. We take on your challenges as our own, going out of our way to find the best solution for your business.

#### Test

Whether you're looking for a straightforward and reliable vulnerability assessment to keep tabs on internal or external network vulnerabilities; a full wheels-up manual penetration test to give your network a thorough workout; or to validate the build of a newly launched system, we can tailor its testing to suit.

#### Comply

If your organisation is engaged in activities that come under the control of a regulator, or if you would like to be aligned with a particular standard or industry best practise, we provide assistance, advice and assurance to help you understand, meet and manage your compliance requirements.

## About Intertek NTA

CSI chose to partner with Intertek NTA as it is a global provider of cyber security testing, auditing and consultancy services. With access to cyber security experts across North America, Europe, the Middle East and Asia, Intertek NTA complements our cyber security services and offer a broader portfolio of services for our clients.

- Accredited by the UK National Cyber Security Centre (NCSC)
- Accredited by the Council for Registered Ethical Security Testers (CREST)
- Accredited by the Payment Card Industry Security Standards Council (PCI SSC)

Penetration testing can involve automated, high level scanning tools, but this is enhanced through the use of Intertek NTA's own test engines and deep experience and expertise. This provides a more comprehensive solution. Red teaming and social engineering services can also be delivered.

## Assurance Services

### Penetration testing of:

- Infrastructure and WiFi
- End User Devices
- Websites and Applications
- Cloud Environments (e.g. Azure / AWS)

### Training and support of:

- Security Awareness
- Security Tools
- Secure Website Development

Tests can be performed remotely or onsite, from a credentialed or non-credentialed perspective, once-off or regularly to provide a depth and breadth of testing appropriate to the target system, data and perceived risk.

We have vast experience across the market sectors most frequently targeted by cyber criminals including financial services, healthcare, manufacturing and government departments.

Testing follows global standards and methodologies such as PCI DSS, Open Web Application Security Project Top 10 and National Institute of Standards and Technology.

## Additional Services from CSI

- Managed Endpoint Protection
- Web Filtering
- Managed Detection and Response
- Managed Phishing Defence
- CSI Cloud Azure Services
- CSI IBM i Cloud Services
- CSI AIX Cloud Services
- CSI Cloud Services for Linux on IBM Power
- AI-optimised Cloud Infrastructure
- Backup and Recovery Simulator
- Data Protection and Cyber Resilience
- Disaster Recovery as a Service
- Professional Services e.g. consultancy, risk mitigation and roadmap reviews
