

OPTIMISE YOUR CSP SUBSCRIPTION WITH CSI AZURE FLEXSUPPORT

INCREASE MICROSOFT AZURE ADOPTION AND EFFECTIVE USAGE

In recent years, with the speed of change accelerating and recent developments in public cloud capabilities, technology has become a competitive differentiator and a driver of innovation and value. It is vital to the transformation and growth of businesses. Microsoft Azure provides a broad set of infrastructure, development and automation services ranging from compute, storage, database and desktop services to more advanced technologies such as artificial intelligence and IoT (internet of things).

As a Microsoft Cloud Services Partner (CSP), we provide a suite of managed services to ensure the Azure platform delivers the advantages of scalability and agility, while also managing costs and maintaining the high levels of security and compliance demanded in highly regulated industries.

CSI's Azure FlexSupport service has been designed to remove the burden of keeping a Microsoft Azure CSP subscription up to date, secure and optimised according to an organisation's requirements. We also help increase your adoption and effective usage of Azure cloud services throughout your organisation.
